**Second Notice**

Waste & Recycling Haulers

RE: Single Stream Recycling Materials

On December 4, 2015 WestRock (formerly known as RockTenn) provided notice of upcoming changes to acceptable single stream recyclable materials list. One of which, mixed glass is now considered a "non-acceptable" material by WestRock.

We understand the magnitude of this change and trust that you have already taken advantage of this notice period and begun the process of working with your customers to remove mixed glass and other non-acceptable materials from the recyclable stream. If you have not, we urge you to begin this process as soon as possible.

Effective July 1, 2016 WestRock will grade and inspect individual loads of single stream recyclables. Loads that contain mixed glass are subject to rejection and/or additional fees including costs to remove non-acceptable material from our facility.

Please contact us if you need help with information regarding mixed glass and other contaminants of recyclables to communicate with your customers.

WestRock appreciates your business and understanding.

Sincerely,

WestRock Recycling
